I'm attaching the draft that I sent to our OAQPS IO just now (it is still not 100% complete). We'll keep you informed of their changes. Thank you all for contributing to making this a better paper. I know it does not fully address every issue that was raised by reviewers, but based on the instruction I was given I think it is the right level of detail. We'll be able to fully discuss pros/cons/legal support/technical issues orally with Sarah (I hope).
